

# Setup manual: E-mail client Outlook 2010

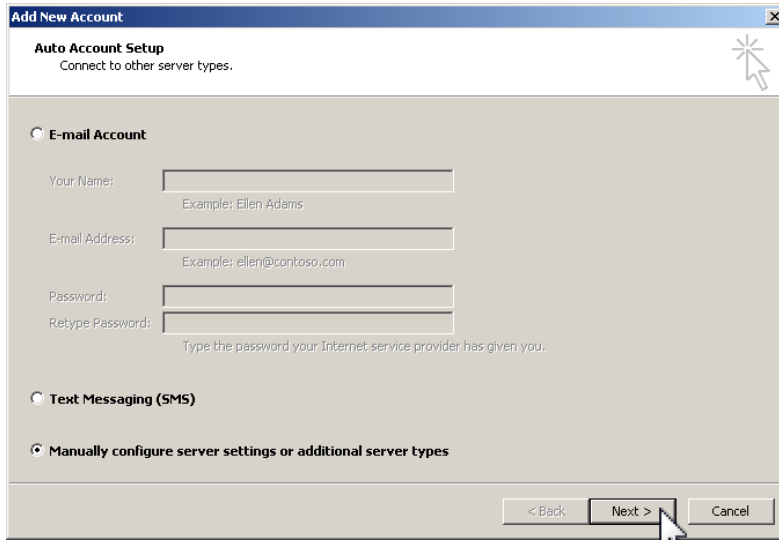

1. Install Office 2010 with Outlook.
2. Run Outlook:  
Start > All programs > Microsoft Office > Microsoft Office Outlook 2010
3. The wizard will appear. If it doesn't appear click on [File] tab, then click on [Account Settings] button > [Add and remove...].

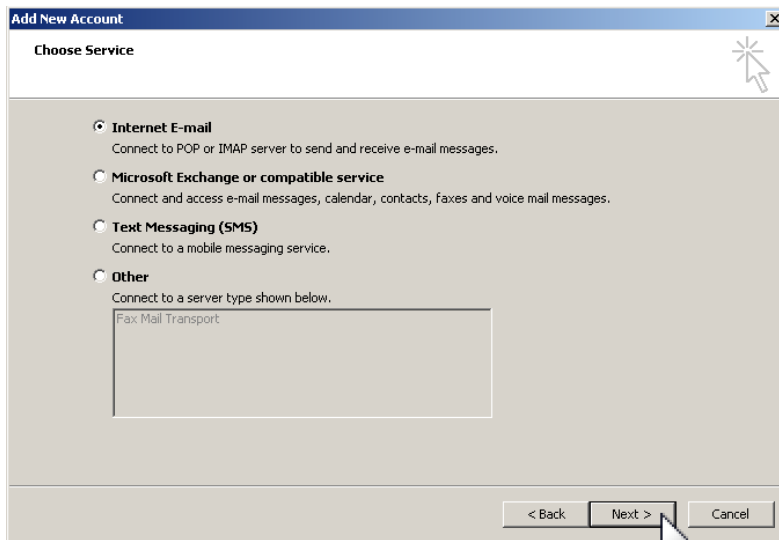

4. Click on [New] button.

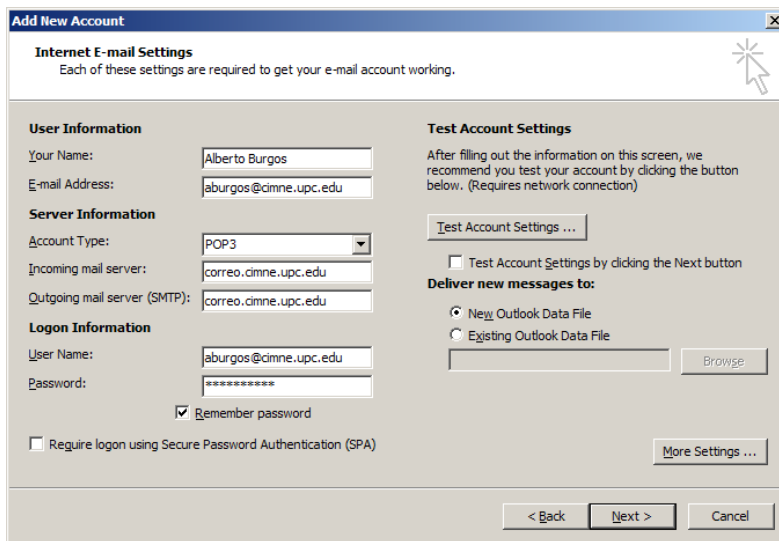

5. Then click on [Next] until you reach this window. Check the option [Manually configure server settings or additional server types] and click on [Next].

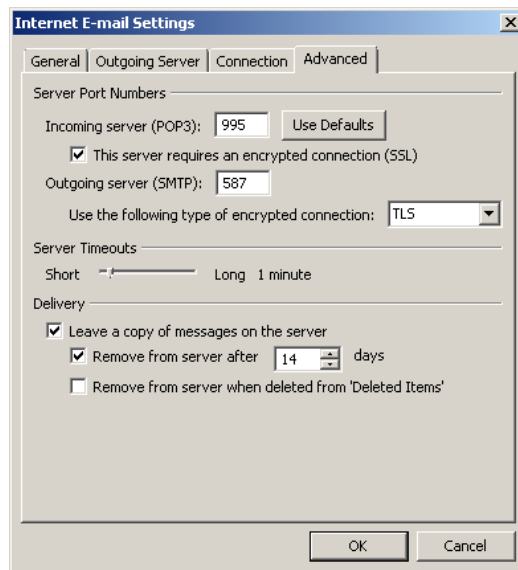

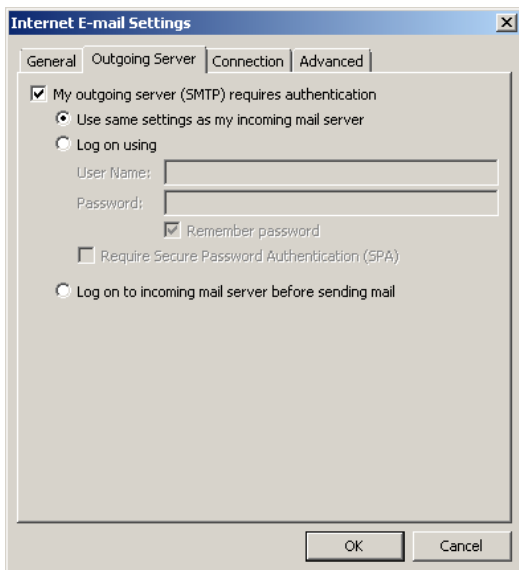

6. Click on [Internet E-Mail] and [Next].

- On the following window fill the fields as shown below (user Alberto Burgos with e-mail aburgos@cimne.upc.edu is used for this example).

- Then click on [More settings ...] and fill [Outgoing Server] and [Advanced] tabs exactly as shown below.

- Click on [OK] to close the window, then click on [Next] and [Close]. Now you can do a Send/Receive e-mails.
